Safe Harbor Statement

Forward-Looking Statements
This presentation contains “forward-looking statements” within the meaning of the federal securities laws, including those statements under “Financial Objectives.” All statements other than statements of historical facts are forward-looking statements. Forward-looking statements include information concerning our business strategies, plans and objectives, market potential, future financial performance, planned operational and product improvements, liquidity and other matters. These statements often include words such as “believe,” “expect,” “project,” “anticipate,” “intend,” “plan,” “estimate,” “target,” “seek,” “will,” “may,” “would,” “should,” “could,” “forecasts,” “mission,” “strive,” “more,” “goal” or similar expressions. Forward-looking statements are based on our current expectations, beliefs, estimates, projections and assumptions, based on our experience in the industry as well as our perceptions of historical trends, current conditions, expected future developments and other factors we think are appropriate. These statements are expressed in good faith and we believe these judgments are reasonable. However, you should understand that these statements are not guarantees of performance or results. Our actual results could differ materially from those expressed in the forward-looking statements. Given these uncertainties, forward-looking statements should not be relied on in making investment decisions.

Forward-looking statements are subject to a number of risks, uncertainties and other important factors, many of which are beyond our control, that could cause our actual results to differ materially from those expressed in the forward-looking statements contained in this presentation. Such risks, uncertainties, and other important factors include, among others, risks related to our business, our separation from our parent company and our common stock. For a detailed discussion of many of these risks and uncertainties, see the section entitled “Risk Factors” in our Registration Statement on Form 10, which was filed with the Securities and Exchange Commission on May 4, 2017 (the “Registration Statement”). All forward-looking statements contained in this presentation are qualified by these cautionary statements. The forward-looking statements contained in this presentation speak only as of the date of this presentation. We undertake no obligation, other than as may be required by law, to update or revise any forward-looking or cautionary statements to reflect changes in assumptions, the occurrence of events, unanticipated or otherwise, or changes in future operating results over time or otherwise. Comparisons of results between current and prior periods are not intended to express any future trends, or indications of future performance, unless expressed as such, and should only be viewed as historical data.

The forward-looking statements in this presentation are intended to be subject to the safe harbor protection provided by the federal securities laws.

Non-GAAP Financial Measures
This presentation contains certain non-GAAP financial measures, including EBITDA Margin, Adjusted EBITDA, Adjusted EBITDA Margin and Free Cash Flow. These non-GAAP financial measures exclude the impact of certain items and, therefore, have not been calculated in accordance with GAAP. We believe these non-GAAP financial measures provide meaningful supplemental information about our operating performance because they exclude amounts that we do not consider part of our core operating results when assessing our performance.

We use these non-GAAP financial measures (a) to evaluate our historical and prospective financial performance as well as our performance relative to our competitors as they assist in highlighting trends, (b) to set internal sales targets and spending budgets, (c) to measure operational profitability and the accuracy of forecasting, (d) to assess financial discipline over operational expenditures and (e) as an important factor in determining variable compensation for management and employees. Adjusted EBITDA is also used for certain covenants and restricted activities under our debt agreements. We believe these non-GAAP financial measures are frequently used by securities analysts, investors and other interested parties to evaluate companies in our industry. We caution readers that our presentation of these measures may not be the same as similarly-titled measures used by other companies. Non-GAAP financial measures should not be considered in isolation or as an alternative to GAAP financial measures, but rather as supplements to GAAP financial measures. For reconciliations of the non-GAAP financial measures to their most comparable GAAP financial measures, see the Appendix to this presentation and the section entitled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Registration Statement.

No reconciliation of the forecasted range of Adjusted EBITDA Margin to net income (loss) is included in this presentation because we are unable to quantify certain amounts that would be required to be included in the GAAP measure without unreasonable efforts, including tax rates and interest expense which were not part of our financial results due to our status as a subsidiary not subject to federal income taxation. Moreover, we believe such a reconciliation would imply a degree of precision that would be confusing or misleading to investors.
## Spin-off Transaction Summary

### Overview
- In September 2016, TEGNA announced its plans to separate Cars.com from TEGNA in a tax-free spin-off.
- Cars.com is a leading digital automotive marketplace, delivering significant value to consumers, dealers and OEMs using innovative, mobile-first digital platforms.

### Listing
- NYSE: CARS

### Distribution
- When-issued Trading Period: May 18<sup>th</sup>
- Record date: May 18<sup>th</sup>
- Distribution date: May 31<sup>st</sup>
- TEGNA shareholders will receive one share of Cars.com common stock for every three shares of TEGNA common stock held as of close of business on May 18, 2017, the record date.

### Capital structure
- In connection with the spin-off, a new capital structure will be put in place, consisting of a $450mm Term Loan A and $450mm revolver, to fund a one-time $650mm cash transfer to TEGNA and to fund working capital.
- Pro forma for the transaction, Cars.com will have total and net leverage of ~2.6x and ~2.5x, respectively<sup>1</sup>, assuming $225mm of the revolver is drawn at close.

---

<sup>1</sup> Based on 12/31/16 LTM Adjusted EBITDA of $260mm
Cars.com Spin-off Rationale

- Augment the core business with greater financial, operational and strategic focus
- Tailor capital structure based on profitability, cash flow and growth opportunities
- Enhance opportunity to pursue targeted organic growth initiatives
- Improve flexibility to pursue value-enhancing acquisitions and adjacencies
- Directly align management incentives with Cars.com shareholders
Company Overview
Alex Vetter, Co-Founder and Chief Executive Officer
We are a Two-Sided Digital Marketplace

*We empower consumers by connecting them to the resources they need to make better automotive decisions about product, price, place and person*

*We enable partners by connecting them to the in-market audience and intelligence they need to increase turn and gain market share*
Cars.com Improves Car Decision Making by Connecting Buyers and Sellers More Intelligently and Efficiently

**Audience**
- New & used shoppers
- Vehicle sellers
- Advice seekers/enthusiasts

**Connections**

**Partners**
- Dealers
- OEMs
- Sell-it-yourself consumers

1 Adjusted EBITDA is a non-GAAP financial measure. For more information and reconciliation of Adjusted EBITDA to net income, please refer to the Appendix of this presentation.

Note: The terms of the affiliate agreements with Cars.com LLC’s former owners were amended on October 1, 2014 to reflect market terms and 2014 is presented on a pro forma basis, consistent with the Form 10. 2014 EBITDA includes $37.9 million in costs associated with the SAR plan.
Quarterly Performance

Quarterly Revenue ($ in Millions)

- Mild seasonality in line with broader auto advertising market
- Q1 2017:
  - Revenue – Modest growth in retail partially offset by 5% decline in wholesale
  - Profitability impacted by marketing costs, public company costs, and duplicate rent
Significant Platform Evolution Achieved with Capital Light Model

Capital Expenditures ($ in Millions)

Affiliate Agreement Highlights

**Overview**
- 6 affiliate relationships
- $170 million of revenue in 2016 (including $25 million of revenue amortization)
- Contracts start to elapse in 2019
- Affiliates bound by minimum performance criteria

**Inception**
- Original wholesale agreements did not reflect fair market value
- Contracts renegotiated at TEGNA acquisition
- Resulted in unfavorable contract liability representing reduced rate of revenue over affiliate contracts

**Impact**
- $25 million revenue amortization annually through expiration of wholesale agreements in October 2019\(^1\)
- Expiration of affiliate agreements expected to provide lift to Revenue and EBITDA as these markets are transitioned into our Retail Channel

---
\(^1\) Excludes Gannett and TEGNA wholesale agreements which expire in June 2020. We may decide to enter into new agreements but will be on arms-length terms.
Affiliate Conversion Provides Significant Upside

Indexed ARPD\(^1\) (base = month end of first month post transition)

- Select markets demonstrate potential of conversion to direct model to result in higher ARPD
- ARPD growth of up to 35% over 12 months in select markets

\(^1\) Average Revenue per Dealer
